Strategic IT Leader | Driving Enterprise ERP Transformations | Aligning Technology with Business Goals

New York City Metropolitan Area

Summary

IT Leader with 20+ years of experience delivering technology solutions across industries, including nearly 7 years in medical manufacturing. I've led digital initiatives from custom business applications to enterprise ERP transformations, bridging IT and business to drive operational efficiency, compliance, and strategic value.

My background spans project management, business systems leadership, and ERP product ownership. I have a strong track record of modernizing legacy systems, leading cross-functional teams, and aligning technology with business goals.

Passionate about simplifying complexity, enabling scalable systems, and driving transformation in regulated environments.

Experience

MTF Biologics
6 years 9 months

IT Product Manager - ERP
March 2024 - Present (1 year 2 months)
Greater New York City Area

As an IT Production Manager - ERP, I lead the strategy, development, and support of enterprise resource planning (ERP) and related business applications. Partnering with IT leadership and key stakeholders, I drive system implementation, optimize performance, and ensure seamless operations across core business systems.

Key contributions:
Spearhead ERP support and development, ensuring business continuity through proactive issue resolution and change management.

Lead a team of business and technical analysts, fostering a collaborative and high-performance work environment.
Define and implement system controls, policies, and procedures to enhance operational efficiency.
Translate business requirements into scalable software solutions, enabling informed decision-making.
Coordinate with cross-functional teams, SMEs, and technical resources to drive ERP initiatives.
Oversee software rollouts, including testing, documentation, and training, ensuring smooth transitions.
Stay ahead of technology trends, recommending innovations to IT leadership.

Manager, Business Systems & Apps
September 2019 - March 2024 (4 years 7 months)
New York City Metropolitan Area

As Manager, Business Systems & Applications, I played a pivotal role in driving system implementations, optimizing business applications, and leading a team of business and technical analysts. I partnered with IT leadership and key stakeholders to develop strategies that enhanced corporate applications, improved business processes, and ensured seamless system support.

Key contributions:
Led cross-functional teams to resolve critical system issues, manage change controls, and drive software enhancements.
Translated business requirements into scalable software solutions, ensuring alignment with organizational goals.
Managed the rollout of system updates, overseeing testing, documentation, training, and IT change control.
Partnered with business leaders to create reports and analytics, supporting data-driven decision-making.
Fostered a collaborative team environment, balancing technical expertise with strategic business insights.
Coordinated with vendors, third-party resources, and IT teams to support business applications effectively.

With a strong foundation in enterprise applications, project management, and IT leadership, I contributed to the success of corporate IT initiatives while maintaining high standards for system performance and user experience.

IT Project Manager

August 2018 - September 2019 (1 year 2 months)
Greater New York City Area

As an IT Project Manager, I spearheaded projects using MTF methodology, overseeing project scope, scheduling, budgeting, and detailed work plans. I evaluated existing information systems to enhance efficiency through automation and directed all phases of strategic project plans from analysis to maintenance. Additionally, I championed seamless business processes, encouraging the early adoption of new systems, and facilitated cross-functional collaboration, ensuring comprehensive documentation and regular progress updates to leadership stakeholders.

Cognizant
Senior Associate
May 2011 - August 2018 (7 years 4 months)
Greater New York City Area

Lead Project Manager at AT&T (Client): Spearheaded end-to-end project management for concurrent, high-complexity projects spanning multiple regions, functions, and business units. Responsibilities encompassed detailed planning, scheduling, and critical path analysis, as well as consolidating sub-team project plans into a cohesive Work Breakdown Structure (WBS). Adeptly managed project risks, issues, escalations, and resolutions while ensuring strict adherence to change control processes. Leveraged deep understanding of business, industry, and technology to implement process improvements and lead teams using Agile/Scrum, Waterfall, and blended methodologies. Held accountability for managing project financials and ensuring alignment between actuals and budgets in collaboration with Application Project Managers.

Project Lead at MetLife (Client): Played a pivotal role in overseeing technology projects and facilitating collaboration between business and IT teams. Translated diverse business needs into effective application software solutions, identified and resolved project interdependencies and integration concerns across multiple projects, and managed crucial relationships with IT and business stakeholders. Additionally, led project meetings, ensured timely updates to the leadership team on project status, and maintained focus on meeting timelines and deliverables to ensure successful project outcomes.
